

TRASH AND RECYCLING

Receptacles are usually located in your carport area or on the other side of the 3-pack or breezeway immediately adjacent to your carport.

TRASH

*Large green cans are for household trash and garbage. Secure the latch and report broken latches by filling out a work order online or in the clubhouse lobby.

*Syringes must NOT be placed in the trash. They are hazardous waste and your doctor or the county health department can assist with their disposal.

RECYCLING

Everything must be empty, dry and unbagged

Nothing smaller than your hand should be placed in the recycling bins

If you only have three yellow recycle bins, glass and cans go into the same bin.

Allowable items for recycling are listed below. All items must be clean.

- *Metal – Only food and drink cans

- *Glass – Only bottles and jars

- *Plastic – Only bottle and jugs

- *Paper and cardboard – no food contact, no shredded paper

- *Cartons – milk and drink cartons – no straws

Heavy cardboard cartons should be folded down and placed next to the bins.

OTHER SUGGESTIONS

- *Plastic shopping bags and Styrofoam containers may be taken to various area stores.

They are NOT recyclable.

- *Electronic items can be dropped off at Clearwater collection site on North Hercules on the last Wednesday of each month.

- *Put garbage and recycling out from Monday morning to Friday. Collections take place on Mondays, Wednesdays and Fridays.

- *It is your responsibility to have household furnishings and remodeling debris removed from the property, not dropped off by the compactor or in trash containers.

- *Small household furnishings and remodeling debris may be dropped off at the compactor in the maintenance area by the clubhouse on the second and fourth Tuesdays.

When in doubt, throw it out! Skip the recycle bin!!
