

TRASH AND RECYCLING

Receptacles are usually located in your carport area or on the other side of the 3-pack or breezeway immediately adjacent to your carport.

TRASH

- Large green cans are for household trash and garbage. Secure the latch and report broken latches by filling out a work order in the clubhouse lobby. Items such as curtain rods and mop handles are to be bagged or bundled and set beside the trash containers.
- Syringes must not be placed in the trash. They are hazardous waste and your Doctor or the county health department can assist with their disposal.

RECYCLING

Everything must be empty, dry and unbagged
Nothing smaller than you hand should be placed in the recycling bins

If you only have 3 yellow recycle bins, glass and cans go into the same bin.
Allowable items for recycling are listed below. All items must be clean.

- Metal – Only food and drink cans
- Glass – Only bottles and jars
- Plastic- Only bottles and jugs
- Paper and cardboard – no food contact, no shredded paper
- Cartons –such as milk and drink cartons - no straws

Heavy cardboard cartons should be folded down and placed next to the bins.

OTHER SUGGESTIONS

Plastic shopping bags and Styrofoam containers may be taken to various area stores.

Electronic items can be dropped off at Clearwater collection site on N. Hercules on the last Wednesday of each month.

It is your responsibility to have household furnishings and remodeling debris removed from the property, not dropped off by the compactor or in trash containers.

Put items out from Monday morning to Friday.
